

DocuBot RAG Test Document

Tenant: TechSupport Corp

VPN Configuration

Employees must connect to the corporate VPN using `vpn.techsupport.local`. The default protocol is WireGuard. MFA is required for every login. If the VPN connection fails, restart the WireGuard client and verify MFA.

IT Helpdesk

For VPN issues contact the IT Helpdesk at extension 1234 or email `itsupport@techsupport.local`.

Expected Questions

1. What VPN does the company use?
2. Is MFA required?
3. How do I troubleshoot VPN issues?
4. What is the IT Helpdesk extension?
